On time and under budget! Need I say more? They let me keep my car until they were actually able to do the repairs. They completed the work by 3 PM on the day before they said the work would be done. Then the most pleasant surprise.... the work was done for \$50 under the estimate.. It's been 2 months since the work was done and my car looks awesome! You would never know that it had been hit by an 18 wheeler.
