

FYZICAL Logo Color Specs:

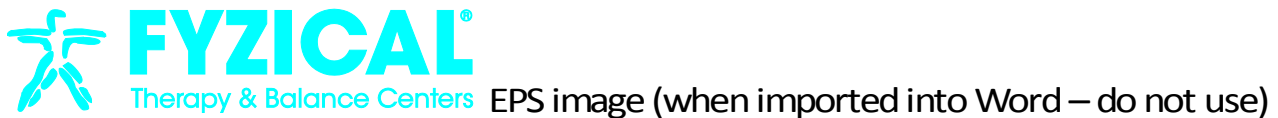

Professional printers will usually request an .eps, .jpeg, or .pdf version of our logo. The FYZICAL logos in all 3 of these formats look exactly the same when imported into a professional design program such as Photoshop, InDesign, or Quark, programs a print company uses. Sending our logo to a printer in any of these formats is acceptable.

When importing the FYZICAL logo into a Word document or other non professional design program, it is best to use the **jpeg** or **pdf** version, as the EPS color does not come through true (See below).

For 4-color press (CMYK), our logo is **100% Cyan**.

The RGB equivalent of 100% Cyan is **R: 0%, G: 174%, B: 240%**

The Pantone color of 100% Cyan is **Pantone Process Cyan**

R: 0 G: 176 B: 240

Pantone color: Pantone Process Cyan

For 4 color printing our logo is:

Cyan: 100%

Magenta: 0%

Yellow: 0%

Black: 0%

RGB color equivalent:

R: 0%

G: 176%

B: 240%
